

Internal Strategy Deck

2026-05-21 — CONFIDENTIAL

Coordinated build: DocuMind · ProductMarketing · RandD · FigmaDSController ·
Figma-Plug-ins · RootDispatcher

Agenda

1. Framework Overview (5 layers + Figma Agent)
2. What We Solved — Technical + Business View
3. Capability Inventory by Repo
4. R&D Study & Gains
5. Training Program Design
6. Pricing (Internal Costs + Client Rates)
7. Team Assignments (who owns what)
8. CRON Meeting Structure
9. Open R&D Questions
10. Roadmap — Now / Next / Later

Chapter 1

Framework Overview

The Five Layers

L5 Skills & Commands

/figma-diagram · /figma-curate · /figma-use
/figma-generate-design · /figma-code-connect

L4 MCP Server (Figma MCP – programmatic bridge)

generate_diagram · get_design_context · get_figjam
curate_diagram · register_diagram · get_diagrams

L3 Scripts (Node.js automation)

export-figma-png.mjs · sync-markdown-config.mjs
scan-all-repos.mjs · fix-markdown.mjs

L2 Plugins (Figma-Plug-ins repo)

Canvas-native operations: DS injection, inspection

L1 REST API (Figma /v1/images/ · /v1/files/)

PNG export scale=2 · Variables · Node structure

+ Figma Agent (May 2026, additive)

Figma Agent vs Our MCP — Key Distinction

	Figma Agent	Our MCP Server
Where it runs	Inside Figma canvas	CLI / agent sessions
Who triggers it	Human designer	AI agent / script
What it can do	Bulk canvas edits, design exploration	Design→Code, Code→Canvas, registry
Scriptable?	No (interactive only)	Yes (fully programmatic)
Available on	Professional+ (full seat)	Any Claude Code session
Launched	May 2026 (beta)	Production since 2025

They work in sequence, not competition.

The Triple Output Rule

Every diagram produces 4 artifacts:

Artifact	Format	Where	Role
Mermaid source	.mmd	docs/diagrams/ each repo	Version control source of truth
PNG preview	.png	docs/diagrams/ each repo	GitHub, PRs, docs
FigJam node	Board URL	Central board	Collaboration, presentation
Registry row	SQLite	DocuMind diagrams table	Tracking, staleness, relink

Central board: fileKey = L8g0zo0Cb90ur2g9fDI9hm

Diagram Registry Flow

```
/figma-diagram invoked
↓
get_diagrams({ repo }) → pre-flight check
↓
[skip if current] [regenerate if stale] [generate if new]
↓
Write .mmd → render .png (mmdc 2× retina placeholder)
↓
generate_diagram({ fileKey, nodeId }) → FigJam section
↓
register_diagram → DocuMind DB (SHA-256 hash stored)
↓
/figma-curate → curate_diagram → 14 repos updated
↓
export-figma-png.mjs → 185kb PNG
```

Chapter 2

What We Solved

Problems → Solutions (Technical View)

Problem	Root Cause	Solution
Diagram drift	<code>.mmd</code> changes after FigJam generated	SHA-256 staleness detection
Broken FigJam links	Standalone files deleted	Curated node URLs (permanent)
Low PNG quality	mmdc default = 22kb	Figma REST export = 185kb (8×)
Manual board placement	No destination config	Pre-configured <code>nodeId</code> per repo
Duplicate generation	No pre-flight visibility	<code>get_diagrams</code> check before every run
Cross-repo link drift	14 repos, manual grep	<code>curate_diagram</code> rewrites all refs at once
Scattered documentation	No central index	DocuMind FTS5 + graph (620+ files)

Business Problems → Solutions

Business Problem	Solution Layer
"Is this design still current?"	DocuMind staleness detection + dashboard
"What changed between handoffs?"	<code>.mmd</code> diffs in git, SHA-256 hash tracking
"Where's the latest diagram?"	Registry <code>active_url</code> field (always current)
"Docs in 14 places, nothing synced"	Single curate call propagates everywhere
"Design and code keep diverging"	MCP <code>get_design_context</code> → direct code generation
"Components renamed, docs still old"	Figma Agent bulk naming standardization

Chapter 3

Capability Inventory by Repo

DocuMind — Documentation Intelligence

Capabilities:

- SQLite FTS5 full-text search (620+ files, < 100ms)
- Diagram registry: register, curate, stale detection
- Document graph: 8 relationship types, recursive CTE
- Scheduled scans: incremental (hourly), full (daily 2am), PDF (weekly)
- MCP tools: `search_docs`, `get_diagrams`, `register_diagram`, `curate_diagram`
- REST API on port 9000; PM2-managed daemon

Active diagrams: 16+ registered, 4 fully curated

RootDispatcher — Coordination Hub

Capabilities:

- Dispatch system: 66+ cross-repo dispatches coordinated
- Repository registry: 19+ repos, authoritative config
- AgentHub integration: availability broadcast, discovery feed
- PM2 ecosystem config: all services registered
- Memory system: changelog, decisions, per-repo profiles

Current blockers:

- AgentHub API key invalid (blocks feed coordination)
- DesignCreation repo not cloned locally

FigmaDSController + Figma-Plug-ins

FigmaDSController:

- Design token / variable management
- Component library maintenance
- `get_variable_defs` MCP integration
- Design-to-code via `get_design_context`

Figma-Plug-ins:

- Custom plugins for canvas operations
- DS injection, naming enforcement, component inspection
- Complement to MCP (handles canvas-only operations)
- Plugin API where MCP has no access

FigmailAPP + CampaignManager

FigmailAPP:

- Email design from Figma → MJML → rendered HTML
- 7-layer pricing model integrated
- Figma Buzz candidate: dark mode variants, layout exploration

CampaignManager:

- Campaign orchestration (planning, approvals, publishing)
- Figma Buzz integration: 0% overlap, 100% synergistic
- ROI: 311% over 3 years, \$316K–\$480K vs build-in-house

RandD — Research & Proposals

Existing assets we can draw from:

Asset	Key Numbers
Figma Buzz + CampaignManager analysis	311% ROI, \$316K–\$480K saved
Pricing & invoicing strategy	7-layer model, SDK @design-dvw/pricing
Figma Buzz integration proposal	Platform analysis, capabilities, limitations
Compliance registry	AI Act, GDPR, legal templates

Chapters 5, 8 owned by RandD — fill by 2026-05-22

Chapter 4

R&D Study & Gains

Full content: RandD — see DISPATCH-066

R&D Gains — Quantified

Metric	Before	After	Delta
PNG quality	22kb	185kb	8×
Search latency	Manual grep	< 100ms	Instant
URL propagation	Manual in 14 repos	1 call	14× faster
Board placement	Manual move	Auto (nodeld)	0 manual moves
Duplicate diagrams	Common	Pre-flight blocked	Eliminated
Figma Buzz ROI	Build in-house	Integrate	311% / \$316K+

Figma Agent — R&D Assessment

High value for:

- FigmaDSController: bulk component naming, variant documentation
- FigmailAPP: dark mode generation, email layout exploration
- Design reviews: comment-to-action plan conversion

Not useful for (yet):

- CLI automation — interactive only
- In-place FigJam editing — create-only, no write-back
- Scriptable dispatches — no programmatic API exposed

Watch for: Figma Agent REST/MCP API (if released — changes everything)

Chapter 5

Training Program

Full content: ProductMarketing — see DISPATCH-066

Training Tiers

Tier	Who	Format	Duration	Price
T1 Awareness	All	Webinar + Q&A	30 min	Free
T2 User	Designers, PMs	Workshop + playbook	1 day	€3,500–5,000
T3 Admin	Devs, agents	Deep-dive	2 days	€6,000–9,000

Scale model:

- Recordings + playbook licensed annually (€1,500/yr)
- Train-the-trainer available (1 additional day)
- Quarterly material updates (tools evolve fast)

Chapter 6

Pricing

Validate: RandD — see DISPATCH-066

Internal Costs (Running the Stack)

Item	Cost	Cadence
Figma Professional seat	\$15–25/seat	Monthly
Claude API	Usage-based	Monthly
DocuMind server	Infrastructure	Monthly
Figma MCP	Free	—
Training material dev	Internal time	Quarterly

Note: Total monthly cost scales with seat count. DocuMind is self-hosted — no SaaS fee.

Client Packages

	Starter	Standard	Premium
Setup	✓	✓	✓
T1	✓	✓	✓
T2 User	—	✓	✓
T3 Admin	—	—	✓
Coaching	1 session	3 sessions	Unlimited (6mo)
Material License	—	1yr	1yr
Retainer	—	—	6mo
Price	€3,500–6,000	€9,000–14,000	€18,000–28,000

Finalize with RandD 7-layer model before quoting.

Chapter 7

Team Assignments

Who Owns What

Chapter	Owner	Due
1 — Executive Overview	ProductMarketing	2026-05-22
2 — What We Built	DocuMind ✓	Done
3 — What It Solves	ProductMarketing	2026-05-22
4 — What It Enhances	FigmaDSController	2026-05-22
5 — R&D Study	RandD	2026-05-22
6 — R&D Gains	RandD + DocuMind ✓	2026-05-22
7 — Training Program	ProductMarketing	2026-05-22
8 — Pricing Model	RandD	2026-05-23
9 — UX Review	FigmaDSController	2026-05-23
10 — Roadmap	RootDispatcher	2026-05-23

Slide Contributions

External pitch deck (12 slides — DocuMind builds):

- Slides 1–3: DocuMind (framework, layers, agent)
- Slides 4–6: ProductMarketing (problems, gains, value)
- Slides 7–9: RandD (Figma Buzz, numbers, training)
- Slides 10–12: ProductMarketing (pricing, setup, CTA)

Internal deck (this file — DocuMind builds):

- All chapters above + chapter contribution slides from each repo

Chapter 8

CRON Meeting Structure

Scheduled Agent Sessions

Session	Cron	Job ID	Output
Daily Standup	09:03 weekdays	787398bb	docs/meetings/YYYY-MM-DD-standup.md
Decision Log	18:03 weekdays	5ce3f001	docs/meetings/YYYY-MM-DD-decisions.md
Weekly Strategy	08:33 Mondays	158951a3	docs/meetings/YYYY-MM-DD-weekly-strategy.md

Note: CRONs are session-scoped. Re-run CRON setup at each session start.
Auto-expire after 7 days.

Meeting report format:

- Done / In Progress / Blocked
- Decisions made + reasoning
- Next actions + owner

Chapter 9

Open R&D Questions

Unresolved (Action Required)

Question	Owner	Urgency
FigJam <code>nodeId</code> per repo — where do users fill this in?	User action	High
AgentHub API key invalid — which key is it?	RootDispatcher	High
DesignCreation repo not cloned — needed for design team agent	User action	Medium
DISPATCH-064 Group B — 9 old redirect URLs uncurated	DocuMind	Medium
"shared-package-hub" node <code>234-3965</code> — what diagram?	User clarification	Low

Answer to nodeId question: Fill in `repository-registry.json` — add `figma_destination: { fileKey, nodeId }` per active repo entry. User creates board sections first, then provides node IDs.

Future R&D Directions

Direction	Status	Value
Figma Agent programmatic API	Waiting on Figma	Very high
In-place FigJam node editing	Waiting on Figma MCP	High
Figma Slides generation via <code>use_figma</code>	Available now	High
Multi-agent Figma design reviews	Possible now	Medium
DocuMind ↔ Figma full sync	Architecture TBD	High

Chapter 10

Roadmap

RootDispatcher to validate — see DISPATCH-066

Now — May 2026

Item	Status
FigJam section nodeId per repo	Blocked — user creates board sections
DISPATCH-065 rollout (destination workflow)	Pending — all repos applying
DISPATCH-064 Group B (9 diagrams)	Pending — needs user node URLs
DISPATCH-066 (this presentation)	In progress
AgentHub API key fix	Blocked

Next — Q3 2026

Item	Effort	Value
Training program v1 launch	Medium	High
Figma Slides via <code>use_figma</code> MCP	Medium	High
In-place FigJam editing	Waiting on Figma	High
CRONs persisted to disk	Low	Medium

Later — H2 2026

- Figma Agent programmatic API integration
- Full DocuMind ↔ Figma sync
- Multi-agent cross-repo design reviews
- Design system compliance scanner (code vs. variables)

Today (2026-05-21):

- Pre-plan ✓ · DISPATCH-066 ✓ · Full report ✓
- External pitch deck ✓ · Internal deck ✓
- Neophyte exec summary ✓ · CRON meetings ✓

Tomorrow (2026-05-22):

- Repo agents fill their chapters (Chapters 1, 3, 4, 5, 7, 8, 9, 10)
- Marp exports: HTML + PDF + PPTX

Day 3–4: Polish · Figma Slides attempt · Final exports

Day 5: Presentation ready.
